

Strengthening Evidence Informed Comprehensive Sexuality Education within Religious Seminaries

A case study of Pakistan by DASTAK Foundation

Improve organization's understanding of barriers that prevent youth at religious seminaries while accessing reliable comprehensive sexuality education.

Increase access to CSE within religious seminaries through development and testing (on-ground workshops) of a youth-friendly educational tool.

Strengthen the commitment of non-traditional allies (religious scholars, religious seminaries teachers) around deconstructing myths preventing mainstreaming of CSE within seminaries

Millions of children study within approximately 33500 registered religious seminaries in Pakistan.
